

CRITICAL THINKING ASSIGNMENT MODULE FOUR

21st-Century Literacies Presentation

Annelies de Groot

Colorado State University Global Campus

Dr. Aime Black
June 7th, 2023

In this assignment, we were tasked with creating a 6-10 slide presentation for educators to inform them of 21st Century literacies and inform them of practical applications and how technology can support their development. These literacies include media literacy, digital literacy, cultural literacy, information literacy, and AI literacy.

I chose to approach this as a slide deck used for professional development for the online tutors that I supervise. This is a unique environment in that they are not the students' classroom teachers and they are already implementing these 21st century literacies in a fairly versatile capacity. However, all the literature reviewed for this assignment agrees in the need for continued professional development for educators, and there seems to be a direct association between teachers' confidence in use of these literacies and their ability to teach them. I have included notes for each slide that serves to further explain the images and quotes on the screen, as well as infographics, videos, and resources for practical application purposes. I have also included a recorded presentation of the slide deck itself as intended to be sent out to the tutors, which includes more applicable commentary to their particular roles.
